RE: FESOP Request for Arrow Gear Company, 2301 Curtiss Street,
Downers Grove, IL, 60515 ID No.043030ABG

Arrow Gear Company is requesting a Federally Enforceable State Operating Permit (FESOP) be issued by the Illinois EPA for the continued limiting of emissions from the source to levels below major thresholds as defined in the Clean Air Act Permit Program (CAAPP), and thereby exclude the source from the requirement to obtain a CAAPP.

We are presently operation and reporting annual emissions to the Division of Air Pollution Control, Compliance and Systems Management. The allowable emissions were established by EPA personnel for Arrow Gear and we report based on actual usage, and percent throughputs.

Arrow Gear would like the Illinois EPA to consolidate all existing permits into a FESOP which covers all emission units and air pollution control equipment at the source.

This application contains the following:

1. Complete listing as reported to EPA for 1996 Annual Emission Reporting.
2. Listing of Application numbers, emission units, and associated air pollution control equipment covered under the present operating permit.
3. Calculations showing how all limits were derived.
4. We will continue to report on an annual basis.
5. Updated information for minor changes from data and information in the current application on file with the agency.

The information contained herein shall supplement the application currently on file with the agency, that information remaining true, current and complete.

Sincerely

Harry Hartzell
Metallurgist/
Environmental Co-ordinator
